***MEMORANDUM OF AGREEMENT #3**

CALCULATION OF COST OF LIVING SALARY INCREASE

To determine the amount of the increase provided for in Article 34.01(b), the total percentage change for the 12-month period specified will be calculated by adding the percentage changes for each of the 12 months in the period and then dividing by 12, rounded off to the nearest hundredth (1/100th) of a percent.

Formula:

1. Calculate the percentage change in the CPI for each month of the 12-month period by subtracting the index for the previous month/year from the current month/year and converting the difference to percentage terms, rounded off to the nearest 1/100th of a percent.

$$\text{eg. } \frac{\text{January 1987 Index} - \text{January 1986 Index}}{\text{January 1986 Index}} \times 100 = \% \text{ Change in Index}$$

2. Add the percentage changes for each month in the 12-month period to determine the total percentage change.
3. Divide the total percentage change by 12, rounded off to the nearest 1/100th of a percent to calculate the average annual percentage change.

2. The revised classification system will not result in any lower entry levels for existing classifications, meaning that the revised classification system will not result in any position title and classification in effect prior to implementation being paid at a lower entry salary grade/pay class following implementation than such position title/classification was paid prior to implementation of the revised classification system.
3. An employee, whose position is reclassified to a classification with a salary grade/pay class which has a lower maximum salary, shall maintain the higher classification and rate of pay on a "present incumbent only" (P.I.O.) basis for such period of time that the employee remains in such position.
